

NEWS RELEASE

STABLCOR TECHNOLOGY, INC. HIRES WILLIAM (BILL) PEIFER AS DIRECTOR OF SALES AND MARKETING

Huntington Beach, CA - October 24, 2013 - Doug Schneider, President and Chief Executive Officer of Stablcor Technology, Inc., is pleased to announce the appointment of William Peifer as Director of Sales and Marketing. In this role, Bill will lead the sales and marketing of Stablcor Technology's patented STABLCOR® product, a carbon composite laminate which provides mechanical and thermal benefits to the Printed Circuit Board and Interconnect Substrate Markets. Mr. Peifer brings a strong background in account development and management within the semiconductor packaging, printed circuit boards, and thermal applications markets.

Most recently, Mr. Peifer served as Director of Sales for sp3 Diamond Technologies, Inc., where he was responsible for sales and account development for the design of Diamond Heatspreaders for RF GaN devices, LED and High Power Laser applications. Mr. Peifer held prior management positions with Yamaichi, SMOS Systems Inc. and CEI.

About Stablcor Technology, Inc.

Stablcor Technology, Inc. is an Intellectual Property company and is the only provider of **STABLCOR®**, a thermally and electrically conductive carbon composite material which, when incorporated within printed circuit boards and substrates, controls heat, thermal expansion, increases rigidity and strength, with no weight premium. The patented laminate and processes to incorporate **STABLCOR®** into printed circuit boards and substrates provides the electronic industry a cost efficient technology to produce smaller electronic products while eliminating the thermal, mechanical, and reliability concerns that currently challenge the semiconductor industry. For more information about **STABLCOR®** visit our website at www.stablcor.com.
